

MD SHOKOR A RAHAMAN

PhD Researcher in Information Technology | Chief Technology Officer | Trustworthy AI for subsurface sensing

Seri Iskandar, Perak, Malaysia | md_17009796@utp.edu.my | +60 13 575 8623

Portfolio: shokor103072.github.io/md-shokor-portfolio/ | ORCID: 0009-0003-7309-3068 | GitHub: shokor103072

PROFILE

PhD researcher at Universiti Teknologi PETRONAS (UTP) studying reliable AI for distributed acoustic sensing and microseismic monitoring. Experience spans peer-reviewed machine learning research, production LLM and document AI, and technology leadership. Research interests include explainable AI, cross-site model evaluation, and signal-evidence auditing.

EDUCATION

2024-Present | PhD in Information Technology - Universiti Teknologi PETRONAS, Malaysia. Supervisor: Prof. Ts Dr Jafreezal Jaafar. Research: reliable AI for DAS and microseismic monitoring.

2018-2020 | MSc in Data Science (Research) - Universiti Teknologi PETRONAS, Malaysia.

2010-2014 | BEng in Electrical and Electronics Engineering - International Islamic University Chittagong, Bangladesh.

PROFESSIONAL EXPERIENCE

Jun 2026-Present | Chief Technology Officer, T3 IT Solutions

Technology leadership for AI workflows, cloud, cybersecurity, and managed IT services.

Jun 2026-Present | Chief Technology Officer, AI Hamra Group of Companies

Technology leadership across the group's business operations.

2023-2024 | Senior AI Engineer, Superstring Capital

Built agentic RAG workflows, structured outputs, AI APIs, and evaluation pipelines for analytics and enterprise use cases.

Jun-Aug 2023 | Machine Learning Engineer, Truth

Developed multimodal document verification with OCR-assisted processing, image preprocessing, and GPT-based form filling.

2020-2023 | Data Scientist, WPDeveloper

Built CV parsing, NER, semantic search, and recommendation systems. Reduced a string-matching pipeline from 15-18 seconds to 0.4 seconds.

2018-2020 | Junior Data Scientist, UTP

Developed ML/DL pipelines for prediction, feature selection, optimization, ensemble learning, and benchmarking.

2015-2018 | Server Engineer & Lecturer, South Asian College Chittagong

Managed computing workflows and taught technical subjects.

SELECTED RESEARCH

Deep learning for DAS-based microseismic candidate-window classification: twelve architectures

Engineering Applications of Artificial Intelligence, 2026. DOI: 10.1016/j.engappai.2026.115622

Physics-constrained quantum-inspired feature selection for CO2 trapping efficiency screening

International Journal of Intelligent Engineering and Systems, 2026. DOI: 10.22266/ijies2026.0930.27

Multi-Branch Hybrid Convolution-Transformer for enhanced microseismic signal classification

International Journal of Intelligent Engineering and Systems, 2025. DOI: 10.22266/ijies2025.0930.51

Optimization of hydropower energy generation using meta-heuristic approaches: a review

Energy Reports, 2020. DOI: 10.1016/j.egyr.2020.08.009

Modelling and optimization of microhardness of electroless Ni-P-TiO2 composite coating

Journal of Materials Research and Technology, 2021. DOI: 10.1016/j.jmrt.2021.03.063

SERVICE & LEADERSHIP

ORCID records 55 peer reviews as of September 2026: 50 for Engineering Applications of Artificial Intelligence and 5 for Array. President, Department of Computing PGSC, UTP (since June 2026); President, Bangladesh Chapter AIS, UTP; Vice President, AIS UTP; Cabinet Member and Head of Media and Communication, PGSC UTP (since September 2026).

TALKS & TECHNICAL SKILLS

Presented the MBHCT microseismic classification study at ICSL / ESTCON 2026. Skills: Python, PyTorch, TensorFlow, scikit-learn, Flask, REST APIs, OCR, RAG, NLP, computer vision, SQL, AWS, GCP, Git, MLflow, and Airflow.

Languages: English (professional); Bangla/Bengali (native).
